

RUMEYSA TASDELEN

FULL STACK PYTHON DEVELOPER

With nearly 1 year of experience as a Full-Stack Python developer, I have successfully completed a "Rent a Car" project using Python, Django, DjangoRestFramework, HTML, CSS, Bootstrap, JavaScript and React, demonstrating strong teamwork and problem-solving skills. After this project, I worked as a team leader and backend developer in many Python projects. I am someone with an analytical mindset, result-oriented, open to innovations, strong communication skills, and prone to teamwork.

PROJECTS

CAR RENTAL

longwyrentalcars.com/

Full Stack Developer (React+Django)

- Designed and developed a car rental website using React, focusing on creating an interactive and user-friendly interface.
- Conducted daily scrum meetings to ensure effective communication and progress tracking within the team.
- Implemented React for optimal responsiveness, enhancing the user experience across various devices.
- Conducted extensive cross-browser testing to guarantee compatibility and consistent performance.
- Implemented unit testing to ensure the reliability and stability of the application.

LIBRARY PROJECT

Python Developer(Django Rest Framework)

<https://rumeysatasdelen7.pythonanywhere.com/>

I developed this project using Django and utilized SQLite as the database. This comprehensive backend project, developed alongside Django Rest Framework (DRF), includes commands for adding, updating, and deleting information such as books, authors, categories, addresses, and more. The application, which successfully stores information in the database, also provides detailed functionalities like borrowing books and filtering by categories. By leveraging Django's robust structure and SQLite's database management capabilities, the project was developed efficiently and is scalable.
